Index 2 Cases by Organizational Partner

For each type of partner, cases identifiers are organized geographically—first alphabetically by state postal code, then multistate (MST), national (NAT), and international (INT) collaborations. The partners are listed in the same groupings and order as in the Introduction (page 7).

Index 3 Cases by Synergy Model

For each type of synergy model, cases identifiers are organized geographically—first alphabetically by state postal code, then multistate (MST), national (NAT), and international (INT) collaborations.
